Movement

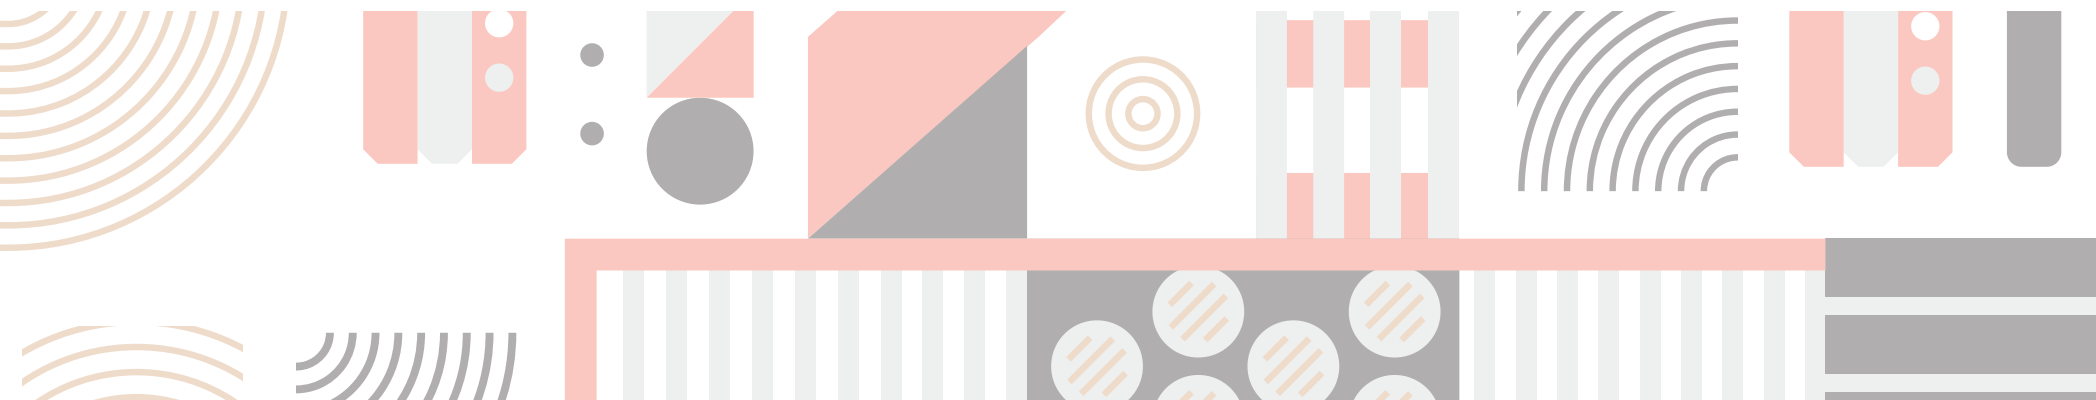

## **WHAT WE DO** (in a nutshell)

We aid companies to move  
material and packages  
within a warehouse or factory

***We design solutions that are:***

- 1. Focusing on small and mid size automation***
- 2. Scalable and Modular***
- 3. Easy to use***
- 4. Customer Centric***
- 5. Quick to deploy***
- 6. With low operations and maintenance cost***

# MISSION

- *Simplify Automation*
- *Make it accessible to all*
- *Make Intralogistics Material & Data flow more efficient, optimized and visible*
- *New Product Development focusing on small and medium sized automation*

# Software Solution

## Data Handling and Processing

- Dynamic Data Type Recognition (mapping client data to ours)
- Multi-Key Sorting
- Custom Sorting Rules
- File Format Compatibility
- Batch Processing (download, process and upload data in batches)
- API Integration (services mentioned below)
- Reports : Filter download Options for CSV, Excel

## Security

- Role-Based Access Control (RBAC)
- Data Anonymization (Client data is saved in codes)
- Detailed Logging (eg:- session tracking for changes made)

## Analysis and Visualization

- Real time Dashboard
- Bell Curve Analysis
- Graphical Analytics
- Statistical Analysis (range,standard deviation,variance)
- Outlier Detection (IP)
- Pattern Recognition (IP)
- Correlation Analysis (done while pre-processing client validation)

## System Health

- System Health Monitoring (up-time,down-time)
- Notification System
- Alarms

## Advanced Features

- Configurable Modes (semi,auto)
- Controlled Validations (min,max according to machine tolerance)
- Calibration for Accuracy (data integrity)
- Event Uploads (can be Scheduled or Dynamic)

## Integration and Communication Protocols

- HTTP/HTTPS
- FTP (File Transfer Protocol)
- MQTT (Message Queuing Telemetry Transport)
- SMTP (Simple Mail Transfer Protocol)
- TCP (Transmission Control Protocol)
- UDP (User Datagram Protocol)
- REST (Representational State Transfer)
- Modbus

## Supported Data Formats

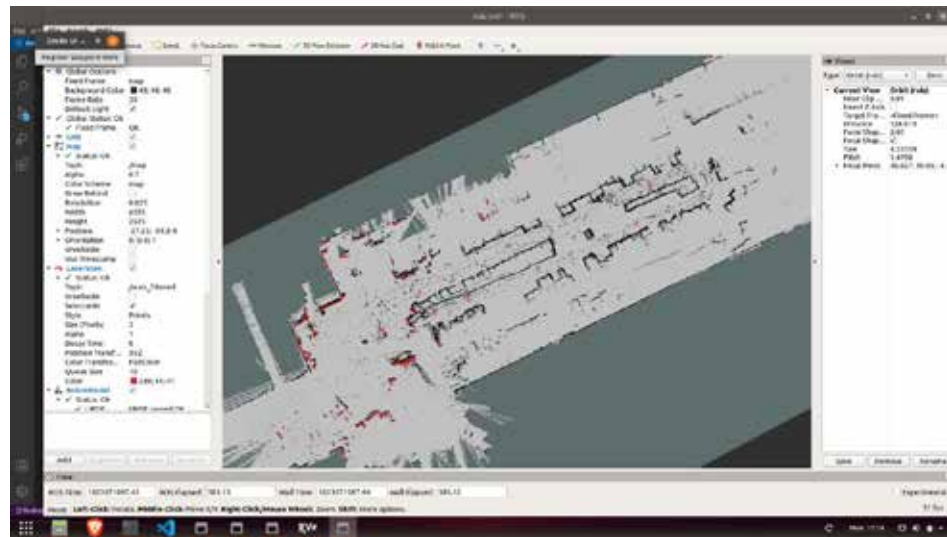

- CSV
- Excel
- XML
- JSON

## Service Integrations

- Express
- SOAP
- TIBCO
- REST

## One-stop Implementation Tool: Roboshop Pro

Roboshop Pro is a simple but strong one-stop implementation tool which can uniformly manage and configure all intelligent devices.

**Navigation Management**

**Fleet Management**

### Parameter Configuration

Rich configurable parameters to grasp details at your fingertips. Running Status Detailed status monitoring to get robot data at a glance.

### Robot Calibration

Automatic calibration process eliminates mechanical and assembly errors to ensure the consistency of multiple robots.

### Robot Model Editing

Visual robot model editing covers size, motion model, drive model, lidar model, motor position, sensor position, peripheral mechanism and more, thus robot making is as simple as building blocks.

### Recognition Object Model Editing

Visual recognition object model editing allows all kinds of shelves, racks, pallets and cages to recognize online.

### Running Status

Detailed status monitoring to get robot data at a glance.

### Log Analysis

Integrated log analysis tool analyzes robot running logs automatically, easy to check errors.

### Script Editing

With Python script programming, it's beyond doubt to control however complex the peripheral mechanism and logic are.

### Dispatching Scenario Editing

Integrated with RDS Core dispatching system, scenario editing adds such scenes as multi-type and multi-floor robot maps, charging piles, mutually exclusive areas, lifts, traffic lights, control cabinets, and automation devices for unified dispatching management.

### Home Page

Manages and configures all intelligent equipment in the LAN uniformly, including robots, intelligent equipment and various automation devices.

### SLAM

Simultaneous localization and mapping enables 2D or 3D maps to build accurately and efficiently.

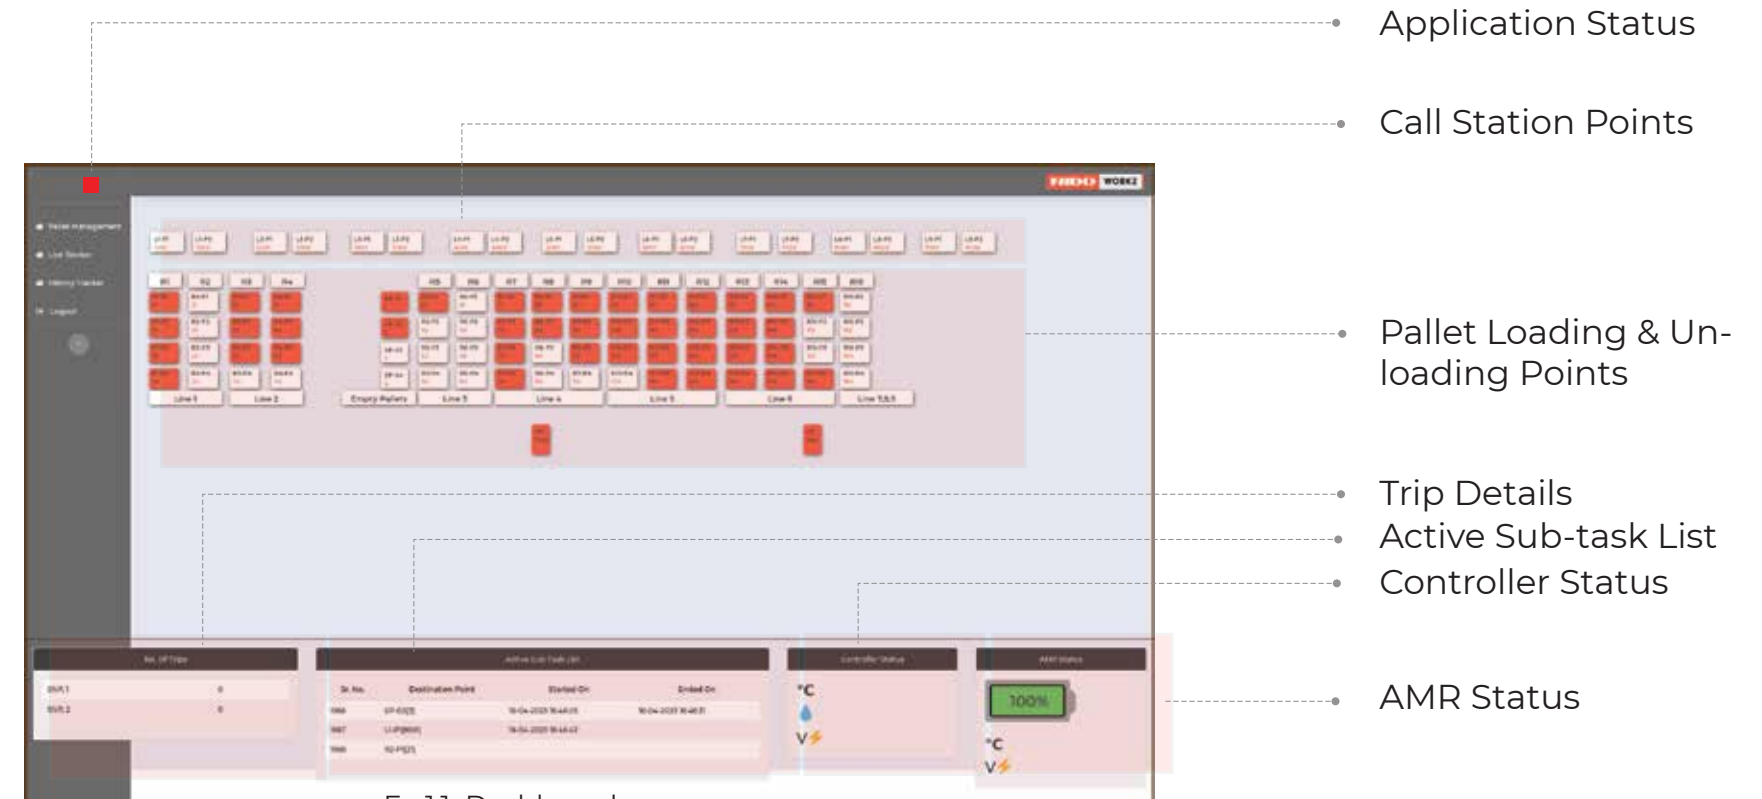

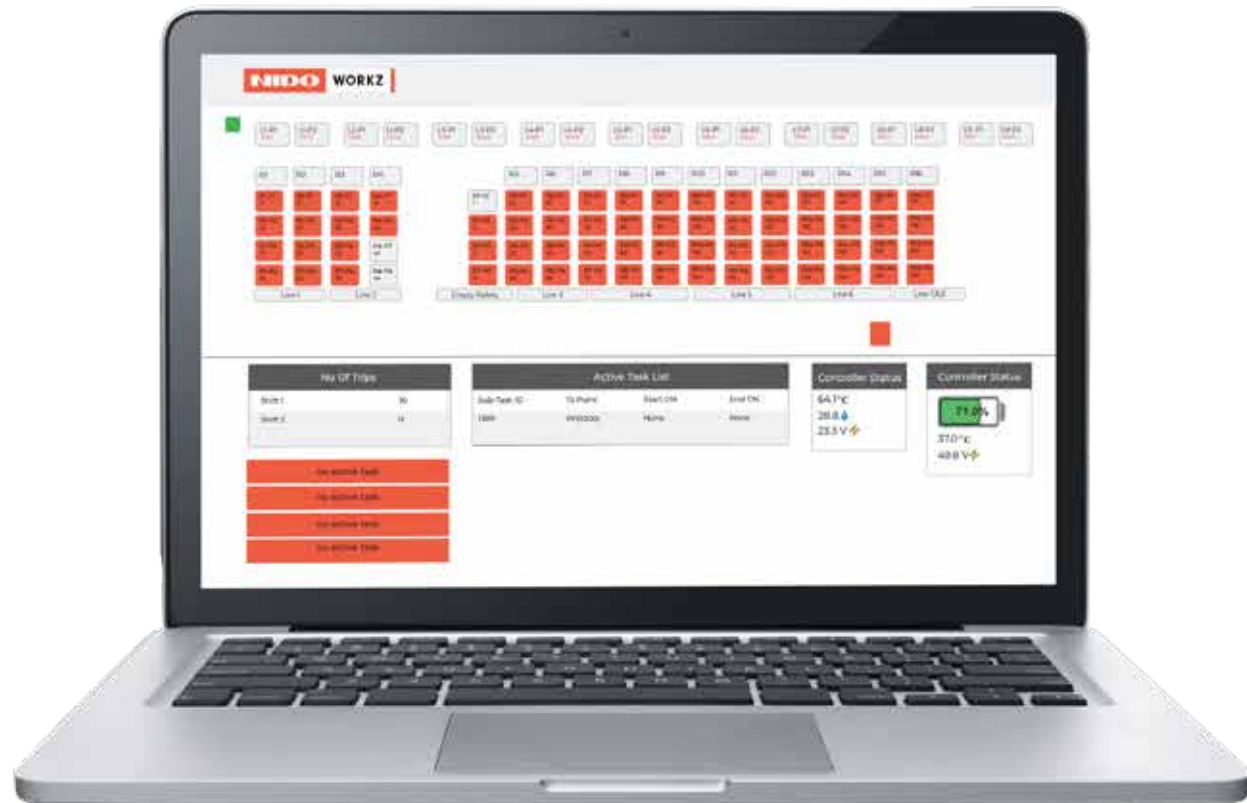

### Map Editing

With easy-to-use map editing tools and high detail control, it can be smoothly edit even for large maps and what you see is what you get.

### Robot Controlling

The robot is controlled in real time; The manual and automatic modes are freely switched, and the API commands are fully covered.

# PalletControl - Pallet Management System (PMS)

Fg:1.1\_Dashboard

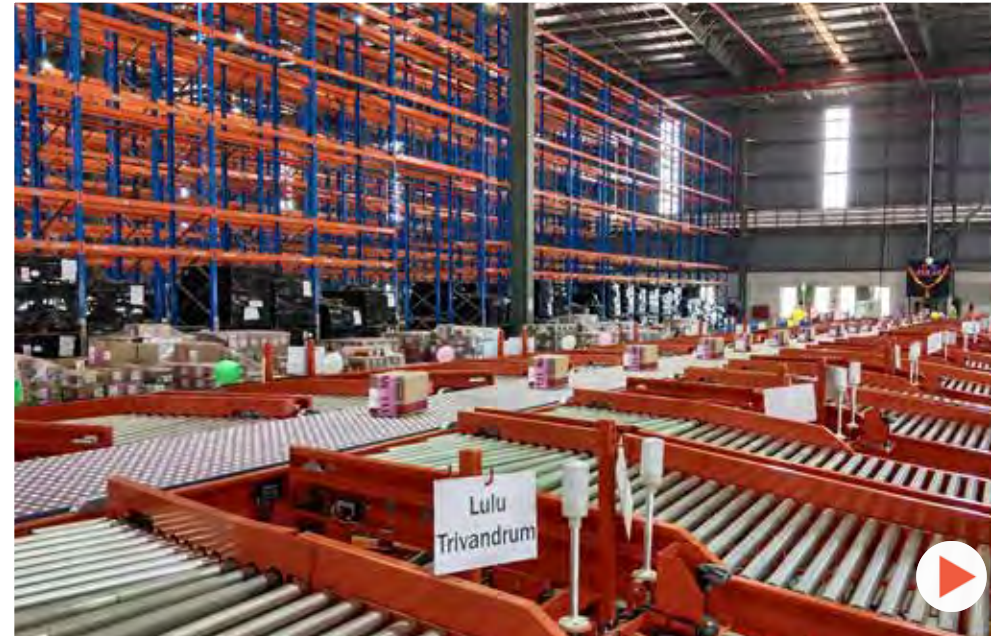

PalletControl Pallet Management System (PMS) collects data from the mobile robots & commands them to pick / drop the pallets within the zones. It provides a complete visibility of the empty and filled pallets and communicates with the Roboshop pro application to manage the fleet of robots.

- Task scheduling, monitoring and management
- Parking and auto-charging of taskless robots
- Robot monitoring and management
- Workshop equipment management
- Route Arranging and Traffic Control
- Users and Roles
- Reports & statistics

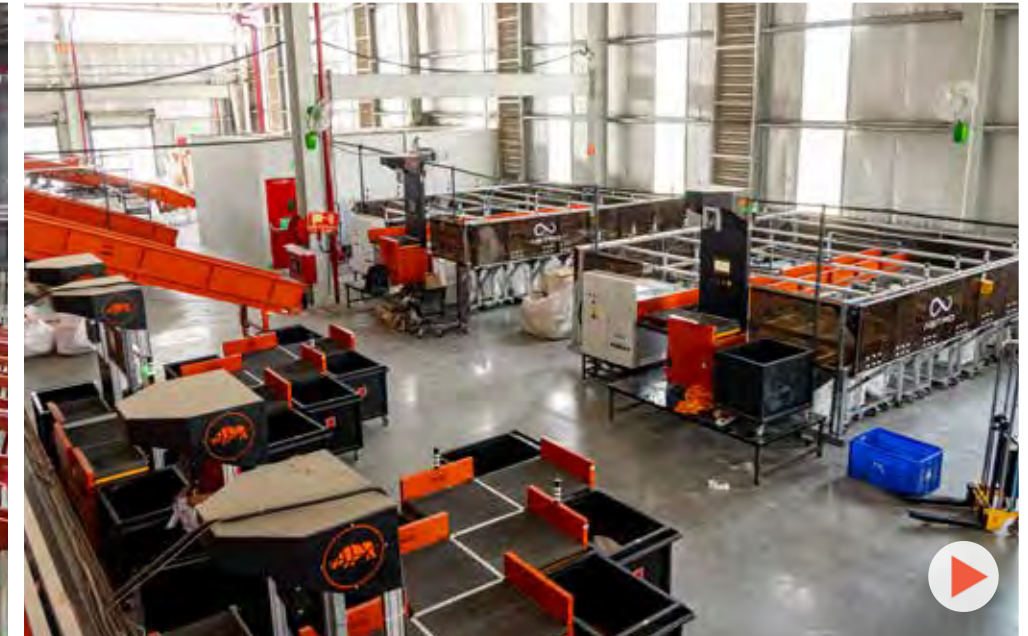

# LANDMARK PROJECTS : SALES

Linear arm sorter with put to light system  
Primary and secondary sorting | Industry: 3PL

Universal ball sorter | Sorting of fragile items  
Industry: Apparel

Carriage belt sorter, Astro sortation system, PTL system, belt conveyor | Conveying, primary, secondary sorting and direct bagging | Industry: Cross border logistics

Carriage belt sorter | Dual induction with 8 way sorting | Industry: 3PL

Telescopic belt conveyor (bulk supply) | Loading and unloading automation | Industry: E-commerce

Solution: Tote handling and sorting | Conveying, colour based sorting, traffic management | Industry: E-commerce

# LANDMARK PROJECTS : SALES

Telescopic belt conveyor with dimensioning and weighing  
Loading and unloading, scanning, weighing and  
dimensioning | Industry: 3PL

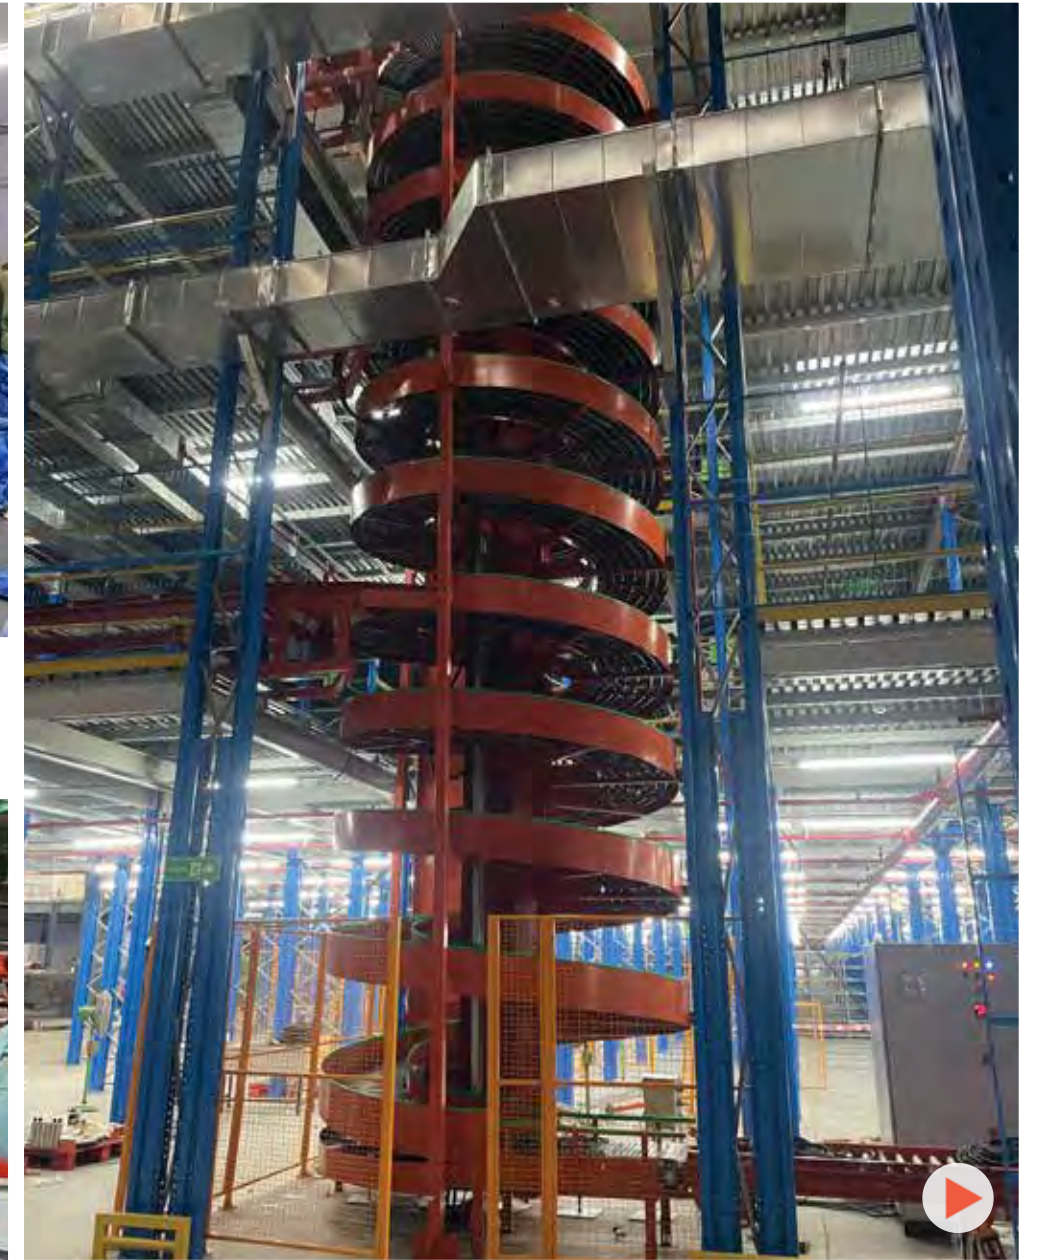

Camera based DWS System, Carriage belt sorter  
Scanning, weighing, dimensioning and sorting  
Industry: Courier express parcel

Solution: Pallet handling autonomous mobile robot |  
Unmanned material handling with pallet management  
application | Industry: Sports retail

Put to light system | Retail store replenishment using  
light module | Industry: Quick commerce

Motorized spiral conveyor  
Vertical transport of items  
Industry: E-commerce

# LANDMARK PROJECTS : SALES

Flexible conveyor, steerable wheel sorter, Astro sortation system | Scanning, weighing, dimensioning and sorting | Industry: Courier express parcel

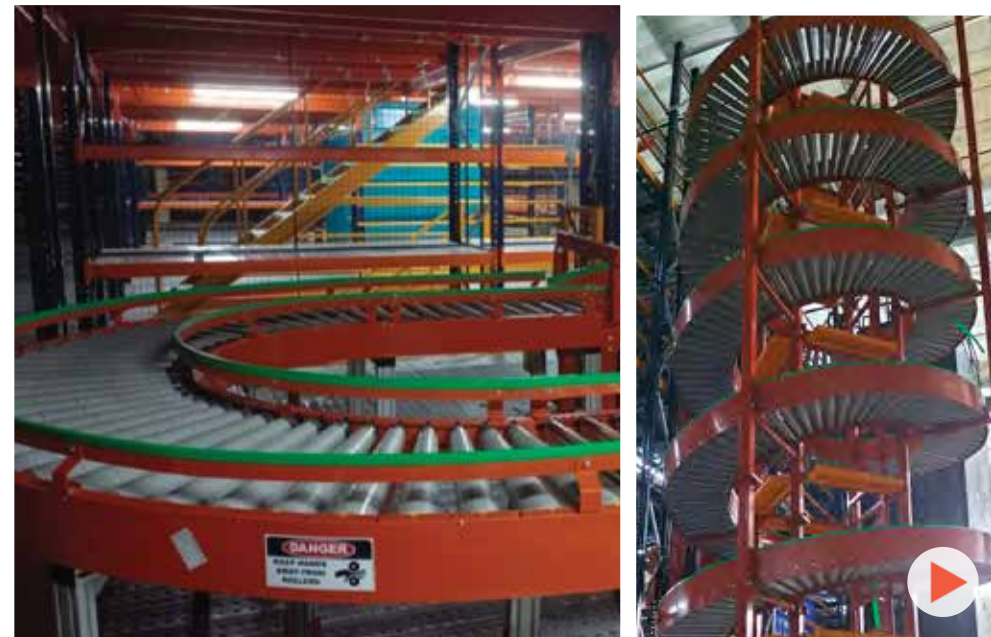

Motorized spiral conveyor, linear arm sorter | Vertical transport and sorting | Industry: Courier express parcel

Steerable wheel sorter, PTL system, Carriage belt sorter | Scanning, weighing, dimensioning and sorting | Industry: Courier express parcel

Conveyor, DWS system, Linear arm sorter | Scanning, weighing, dimensioning and sorting | Industry: Cosmetics

Gravity spiral conveyor | Downward transport with multiple inductions | Industry: Logistics

Pallet handling autonomous mobile robot | Unmanned movement of palletized loads | Industry: Appliances

# LANDMARK PROJECTS : SALES

Volume distribution system | Conveying, sorting and volume distribution system | Industry: E-commerce

Conveyor automation | Conveyor automation with traffic management | Industry: Courier express parcel (Location: Bahrain)

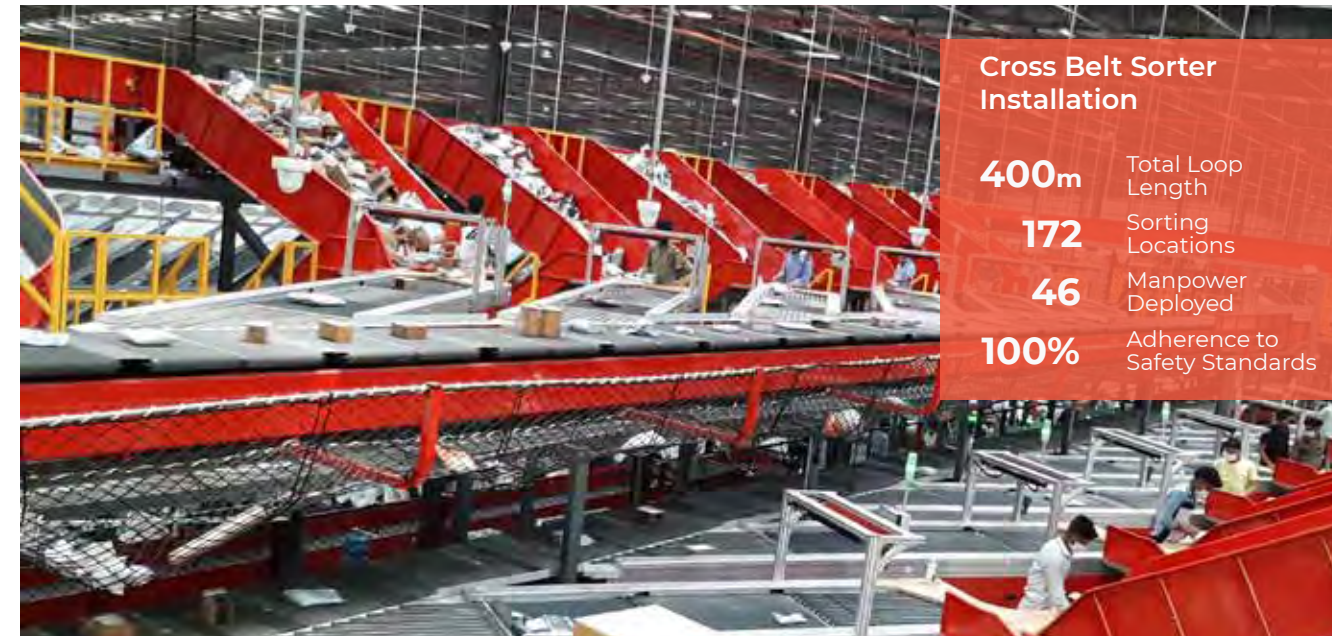

Astro Sort V | Vertical sortation of items to chutes | Industry: Courier express parcel/ 3PL

# LANDMARK PROJECTS : PROJECT MANAGEMENT & EXECUTION

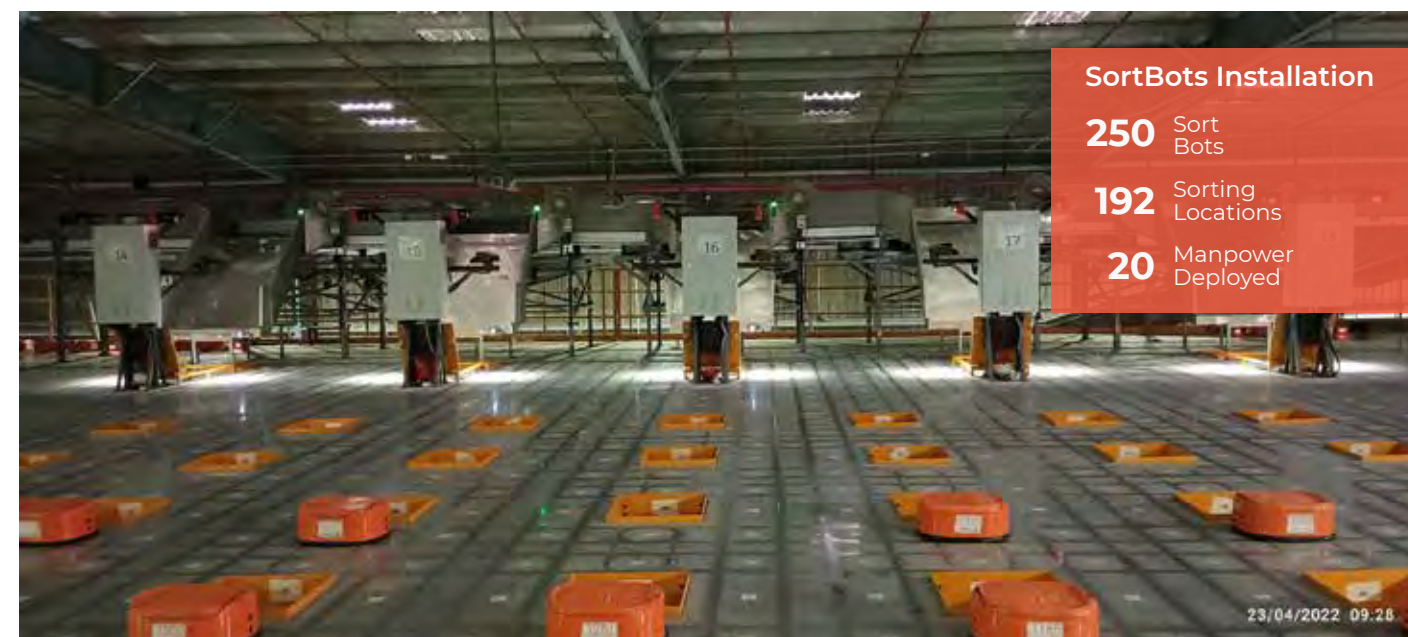

## Bag Sorter Dismantling, Shifting & Re-installation

**2000m** Conveyor Length  
**68** Manpower Deployed  
**100%** Adherence to Safety Standards

## Cross Belt Sorter Installation

**400m** Total Loop Length  
**172** Sorting Locations  
**46** Manpower Deployed  
**100%** Adherence to Safety Standards

## SortBots Installation

**250** Sort Bots  
**192** Sorting Locations  
**20** Manpower Deployed

## Colour Tote Conveyor Installation

**3268m** Mezzanine  
**1200m** Conveyor Length  
**40** Manpower Deployed
